I Will Available Upon Request

PROFILE

Frontend-focused Web Developer with strong expertise in HTML, CSS, JavaScript (ES6+), Tailwind CSS, and React.js. Currently expanding into full-stack development using Node.js, Express.js, MongoDB (Mongoose), with Next.js in progress. Hands-on experience in building real-world applications, implementing authentication systems, integrating REST APIs, and following Git-based workflows. Highly motivated to grow as a MERN / Full Stack Developer and contribute to scalable, user-centric web applications.

WORK EXPERIENCE

CodeAlpha

June - July 2025

Fronted Development.

Developed responsive web interfaces using HTML, CSS, & JS. Collaborated with the team to enhance UI/UX using modern design principles.

Personal Projects

2024 - 2025

PitchCraft (Hackathon Project)

AI-powered startup pitch generator built with React, Gemini API, and Supabase, developed during a 12-hour hackathon.

Trend Mart

React-based eCommerce web app with Supabase authentication, API integration, and responsive UI using Tailwind CSS.

Quiz Web App

Interactive quiz application with authentication, timer-based quizzes, real-time scoring, and Supabase backend usage.

Authentication System (Full Stack)

Self-designed Signup & Login system built with Node.js, Express.js, MongoDB, and JWT, including password hashing and protected routes.

Todo App (Full Stack)

CRUD-based Todo application developed using React, Node.js, Express.js & MongoDB, featuring user authentication and secure data handling.
